

Analytics Suite

The Fast, Friendly, Flexible Business Intelligence Solution for Managing Your Business.

Superior care and better outcomes don't happen by accident. Your business depends on monitoring performance and progress in near real-time.

MatrixCare Analytics allows you to:

- Quickly and easily identify emerging or existing financial, marketing or clinical issues
- Access and analyze data from your device of choice, via an internet browser
- Build custom reports and dashboards based on any information within the MatrixCare system
- Access and incorporate data from third party systems

An Easy to Use, Custom Solution

Analytics Suite

MatrixCare Analytics is a robust reporting and business intelligence tool that helps you monitor key performance indicators and understand what is driving your business. Because Microsoft® Excel® services are embedded in Analytics, any advanced Excel user can quickly and easily create visually appealing reports and dashboards. The Analytics platform also allows you to aggregate data from other sources to deliver meaningful answers to key questions about the performance of your business and your residents' clinical outcomes.

With MatrixCare Analytics, you can harness the power of the data in MatrixCare and other systems that are mission critical for your business.

- **Track:** Key performance indicators can provide a snapshot of organizational performance, in near real-time, relative to clinical and operational goals.

- **Adjust:** Near real-time information available whenever you need it, wherever you are means that you can make immediate adjustments to positively impact performance today rather than waiting for a report to tell you how you did last week or last month.

- **Analyze:** Data is the heartbeat of your business – you can use MatrixCare Analytics to drill into the data to understand what is driving performance.

- **Improve:** With an understanding of the root causes underlying clinical and operational performance, you can modify protocols and processes and monitor the results.

- **Ask & Research:** Take questions from executives and leaders in your organization and drill into the data to find the answers. Companywide initiatives can be identified based on findings to further improve outcomes, surveys, audits, processes, etc.

Using the goals you set for your organization, you can create report schedules to monitor your organization's progress and achieve consistent reporting and accurate benchmarking.

About MatrixCare

MatrixCare solutions have powered the long-term care continuum for over 30 years. MatrixCare is the largest LTPAC technology provider in the U.S. and the first to offer a true full spectrum solution. Used in more than 11,000 facility-based care settings and 1,400 home care and home health agencies, MatrixCare's solutions help skilled nursing and senior living providers, continuing care retirement communities, and home health organizations to prosper as we migrate to a fee-for-value healthcare system. Through our common care coordination platform, we are also able to offer the industry's first solution for helping the emerging set of conveners and diversified LTPAC operators to deliver superior care and better outcomes across the full spectrum of care.
