

MatrixCare Clinical Coach™

Better Outcomes via Clinical Decision Support at the Point of Care

MatrixCare Clinical Coach drives better resident outcomes by facilitating the use of evidence-based practices at the point of care. It provides protocols and templates resulting in standardized practices across your organization. Clinical Coach supports providers' transition to fee for value by using structured data to support analytics and interoperability.

MatrixCare Clinical Coach™

Clinical Coach™ will help you:

- Improve the quality of resident care
- Increase the efficiency of the nursing staff through a streamlined documentation process
- Guide clinical decision-making through embedded, evidence-based practices
- Facilitate communication with healthcare providers through standardized data
- Improve clinical data integrity through the reduction of narrative documentation
- Enhance quality assurance and process improvement (QAPI) programs

Clinical Coach, exclusive to MatrixCare, provides sophisticated clinical intelligence at the point of care. It uses evidence-based protocols from industry leaders including:

- AMDA (The Society for Post-Acute and Long-Term Care Medicine),
- Johns Hopkins, and
- The National Pressure Ulcer Advisory Panel.

Clinical Coach helps to improve the quality of life of the resident by helping organizations:

- Positively impact clinical outcomes through the use of research tested assessments and associated interventions
- Track changes in condition through alerts allowing timely notification to physicians
- Focus on prevention by anticipating resident risk
- Improve chronic care management through the use of evidence-based practices
- Provide staff with more resident care time by decreasing time spent on documentation

Clinical Coach helps reduce readmissions and improve clinical outcomes by:

- Identifying the resident's abnormal signs and symptoms.
- Monitoring parameters based on history and physical assessments.

For medication administration, the preparation of each medication is tracked as well as whether the medication was taken or refused by the resident. Administration of PRNs is also tracked. CareAssist alerts supervisory staff of overdue medication administration.

MatrixCare CareAssist helps you deliver superior service for better outcomes in workflow, efficiency and quality of care.

About MatrixCare

MatrixCare solutions have powered the long-term care continuum for over 30 years. MatrixCare is the largest LTPAC technology provider in the U.S. and the first to offer a true full spectrum solution. Used in more than 11,000 facility-based care settings and 1,400 home care and home health agencies, MatrixCare's solutions help skilled nursing and senior living providers, continuing care retirement communities, and home health organizations to prosper as we migrate to a fee-for-value healthcare system. Through our common care coordination platform, we are also able to offer the industry's first solution for helping the emerging set of conveners and diversified LTPAC operators to deliver superior care and better outcomes across the full spectrum of care.
