CLINICAL & RESIDENT MANAGEMENT

Matrixcare® for skilled nursing mobile clinical charting Technology helps hands-on staff document resident care more Accurately and completely while promoting communication Between clinical staff, physicians, and other providers.
MatrixCare Point of Care combines the convenience of portable device documentation, the integration of new data with existing records and the virtual elimination of paper-based records. Point of Care is fully integrated with MatrixCare to provide a manageable operational environment and security-protected real-time access to resident care information at any level of the organization.

MatrixCare Point of Care can be accessed on a number of portable devices, such as tablets, kiosk PCs, and more. Certified Nursing Assistants and other users can access resident care needs and assignment information as well as complete documentation on MDS supporting data and vital signs, intakes, and outputs. Real-time integration with MatrixCare coordinates the scheduling of MDS and vital sign required-charting and resident alerts for vitals that are out of range. This integration automatically updates the resident record with vitals documentation and provides supporting data for MDS completion.

An integrated system is the key to a successful clinical operation because it makes efficient interdisciplinary sharing of vital information possible. Point of Care provides real-time data sharing and communication that eliminates the need to sync systems or download information.
CONSISTENT AND ACCURATE MEDICAL RECORD DOCUMENTATION

Documentation is a one-step process, eliminating the need to keep fragmented paper-based medical records. Users are alerted to the areas where documentation is required for their shifts.

PRECISE DOCUMENTATION AND CARE PLANNING

MatrixCare Point of Care documentation enhances the evaluation of care provided to help determine the resident’s current condition and needs.

INCREASED TIME SPENT WITH RESIDENTS

Less time spent tending to paperwork and administrative tasks increases time spent with residents and quality resident care.

IMPROVED STAFF MANAGEMENT

Caregivers receive clear communication of resident needs and the tools to organize their time, documentation and data through MatrixCare assessments and events. This information helps MatrixCare Point of Care users make more informed decisions about resident care.

IMPROVED COMMUNICATION

Access to real-time resident care information is available to the entire interdisciplinary team.

LOOK BACK OPTION

The Point of Care Look Back option enables direct care staff to see a defined amount of history regarding items documented in MatrixCare Point of Care to further eliminate the need for clipboards or other binders traditionally used to track toileting, vitals, and other tasks. Security driven setup allows the facility or corporation to control the amount of Look back history to be shared. Look back functionality helps caregivers plan tasks, stay on schedule, and see any important changes in resident status at a glance.

OPTIMIZED RUGS REIMBURSEMENT

Optimize RUGs reimbursement through more accurate MDS supporting documentation, including ADLs, therapies, mood and behavior.

REDUCTION IN ADMINISTRATIVE COSTS

Electronic charting eliminates time spent organizing, recoding, and searching for paper-based charts. In addition, you decrease the amount of paper and duplication of effort, and improve the ability to capture accurate measurement of resources used for resident care.
Point of Care

Because charting is done electronically as care is given, staff can spend more time with patients providing the care they need and deserve.

- Julie Chartreau, IS Director, Bradford Ecumenical Home

About MatrixCare
MatrixCare solutions have powered the long-term care continuum for over 30 years. MatrixCare is the largest LTPAC technology provider in the U.S. and the first to offer a true full spectrum solution. Used in more than 11,000 facility-based care settings and 1,400 home care and home health agencies, MatrixCare’s solutions help skilled nursing and senior living providers, continuing care retirement communities, and home health organizations to prosper as we migrate to a fee-for-value healthcare system. Through our common care coordination platform, we are also able to offer the industry’s first solution for helping the emerging set of conveners and diversified LTPAC operators to deliver superior care and better outcomes across the full spectrum of care.
