**STAFF TO LEVELS OF ACUITY AND
CONTROL LABOR COSTS WITH
ONSHIFT AND MATRIXCARE**

OnShift MatrixCare® Integration

CONNECTIONS

IMPROVE EFFICIENCIES AND QUALITY OF CARE

Save time and eliminate complexities with acuitybased staffing information at your fingertips. The OnShift-MatrixCare integration combines census, resident acuity and labor information for more effective staff management and better coordination of care.

REBALANCE COSTS MORE PRECISELY

With the OnShift-MatrixCare integration, providers can improve staff to more precise hours-of-care requirements, while avoiding the hidden costs of improper staffing.

HOW IT WORKS

Information including census data by level of care, such as RUG scores or resident acuity levels, is automatically captured from MatrixCare. OnShift uses this information to determine precise hours of care required, while providing predictive data to suggest adjustments to staffing levels.

“RFMS is able to give our residents the high quality care that they deserve by determining staffing plans that take census and resident care needs into account.

The integration between OnShift and MatrixCare streamlines this process behind the scenes, so our facilities can easily make staffing adjustments based on the actual clinical needs of residents.”

About MatrixCare

MatrixCare solutions have powered the long term care continuum for over 30 years. MatrixCare is the largest LTPAC technology provider in the US and the first to offer a true full-spectrum solution. Used in more than 12,000 facility-based care settings and 2,000 home care and home health agency locations, MatrixCare's solutions help skilled nursing and senior living providers, life plan communities (CCRCs), and home health organizations to prosper as we migrate to a fee-for-value healthcare system. Visit www.matrixcare.com and www.carecommunity.com for more information.
