

SKILLED NURSING FACILITIES

Integrated software system

MatrixCare[®] is the easy-to-use, integrated clinical and financial software system that improves clinical outcomes and maximizes provider performance.

Full data integration

Clinical and financial users share one point of data entry for all census and resident information, producing consistent, accurate, streamlined records. Resident messaging facilitates communication, alerting the appropriate parties to changes in the system, and RUGS information flows between clinical and financial functions to ensure accurate billing.

Accounts receivable

MatrixCare accounts receivable is completely customizable. The unique charge calculator maximizes cash flow with flexible billing generation and statement creation, automatic recalculation, and retro-billing. The automated process ensures data integrity, producing a balanced general ledger and fully distributed cash receipts. Eliminate time spent entering ancillary charges and payer remittances by automatically uploading charges and cash from third party systems or from an Excel spreadsheet.

User-defined assessments

MatrixCare's 100+ interdisciplinary user-defined assessment templates help you standardize and customize documentation, ensuring robust charting across your organization. Documentation is integrated with other areas to simplify coordination of care and ensure proper follow-up, bringing you streamlined, efficient charting and reduced litigation risks.

Claims management

MatrixCare claims management efficiently manages your claims editing, transmission, audit trails, and compliance, accelerating cash flow and improving accounts receivable processes.

MatrixCare claims management offers:

- Thousands of electronic payer connections
- Transmission of UBs and 1500s
- Automatic posting of 835 electronic remittance advices (ERAs)
- Rejection alerts
- Timely claims resubmissions

Sophisticated payer-specific editing capabilities significantly reduce rejections and rebilling, resulting in faster reimbursements and higher first-time acceptance rates.

Collections

MatrixCare collections works in real-time, tracking resident balances nightly. Once an account meets your predefined criteria, MatrixCare automatically creates a plan customized for your organization, which can include follow-up tasks.

Customer trust

MatrixCare resident trust helps you track resident funds easily and includes a feature for managing the resident trust petty cash drawer.

Close resident trust at your convenience with a separate month end close process.

MDS and care plans

MatrixCare MDS tools help you complete assessments efficiently with the most comprehensive, accurate information available. Pre-filled data, electronic signatures, CAA worksheet integration and RUG-IV optimization are just some features available to facilitate the MDS process. Care planning is highly customizable, making it useful for every care setting. Care plan libraries provide guidance and user-defined templates provide flexibility.

Physician and nursing orders, eMAR and ePrescribing

With MatrixCare orders, you can reduce time spent on order management. Resident formulary checks help ensure reimbursement, safety alerts reduce errors and automatic transmission to the pharmacy or lab helps mitigate risk for error.

Orders are integrated with MatrixCare eMAR, improving medication administration efficiencies and staff satisfaction. The eMAR workflow is automated and the full process completely eliminates paper charting administration. MatrixCare ePrescribing helps you prescribe accurate medications in a timely, cost effective manner by automating the prescription drug process.

Electronic communication between providers helps increase efficiency and improves service to your facility and residents.

Point of care

MatrixCare point of care (POC) for mobile clinical charting helps hands-on staff document resident care while promoting timely communication between staff and other providers. With POC, you get easy-to-use, convenient portable device documentation with new data integration and virtual elimination of paper-based records.

Having the financial and clinical records in one system has enabled us to eliminate some duplication of work/records. We are more efficient, with better documentation. This impacts payroll expenses.
