

CLINICAL ADVANCED INSIGHTS

The first and only skilled nursing EHR with built-in, intelligent machine learning that evaluates more than 150 clinical data elements to predict falls and changes in condition, so you can provide more proactive and efficient resident care.

How it works

An easy-to-use dashboard updates in real time so you can see the status of every facility, floor, and resident. Aggregated acuity and fall risk scores let you see at a glance whether a resident’s condition has changed in the last half hour, overnight, or over the weekend. Armed with these insights, you can quickly identify at-risk residents to deliver preventive care and shift staff as needed.

Acuity dashboard

Fall risk dashboard

What this means for your skilled nursing facility

Resident care

- Focus staff time on providing high-quality, preventive care
- Redeploy staff as needed based on real-time changes in condition
- Develop proactive care plans and interventions using key vitals and acuity scores

Clinical operations

- Quickly group residents based on acuity levels and fall risk to evenly distribute workload
- Track changes in condition across your entire facility
- Streamline workflows with fewer reports and no manual chart review

Financial operations

- Proactively control risks and costs
- Lower expenses and improve ratings with fewer rehospitalizations
- See a complete performance picture with integrated data from across your organization and from external data sources

“Clinical Advanced Insight’s at-a-glance dashboards have become a critical component of our staff’s daily routines.”

Annette Salisbury, Senior Vice President of Clinical Services at PruittHealth

Real-world results

Current customers have

Decreased falls by at least 50%*

Trained staff in as little as 30 minutes

Predicted changes in condition and fall risk with 85% accuracy*

**Based on machine testing and clinical pilot feedback. Customer results may vary.*
