Point of care and eMAR in a single, easy-to-use application

CareAssist can help drive consistent, quality care with data capture and workflows that save staff time, support safer medication management, provide comprehensive, electronic data, and improve staff and resident satisfaction.

Leveraging technology can be a crucial tool to help you manage changing regulations, reimbursement, and documentation requirements. MatrixCare's CareAssist can help you improve clinical documentation, collaboration, and reporting which can save your staff time, support consistent care quality, and improve resident satisfaction.

Help staff work more efficiently

- Electronic workflows and data capture are faster and more accurate than paper to improve compliance and can ultimately lead to higher reimbursements.

- Electronic alerts indicate out-of-range readings, and real-time reports help staff take action quickly.

- Important information is combined in one view that can be customized to put the information your facility needs most at the top.

Support safer medication management

- Bar code scanning supports safe and efficient medication passes by automatically checking against the five rights of medication administration.

- Compared to paper records, eMAR reduces the time your staff needs to pass meds and helps decrease medication errors.

- Electronic controlled substance tracking supports clear, complete documentation.

Comprehensive electronic data capture

- Electronic clinical documentation allows better reporting, better audits, and ultimately supports higher reimbursements.

- Standardization increases the integrity of your data and makes it easier to track compliance.

- Managers can access information from different facilities, anywhere, any time, and can monitor who is accessing data to help improve security.

Improve staff and resident satisfaction

Quality of care directly affects the quality of life for your residents. MatrixCare CareAssist helps your staff consistently deliver quality care by making data entry faster and more accurate, improving the safety of medication management, and giving caregivers more time to focus on your residents.
