

Enterprise Financials

Used in more than 800 out-of-hospital facilities, our fully integrated modules and comprehensive financial management tools give you all the functions you need in one place. Robust partner integrations let your staff quickly manage day-to-day tasks so they can spend more time on strategic work that can strengthen your business.

General ledger

Capture all information – expense and credit, financial status, and more – all in one place. With unique features including user-defined query, reporting range, and sort options, you'll have the ability to customize outputs to meet your organization's requirements.

Accounts payable

Give your staff the tools they need to be efficient with accounts payable. You'll be able to accommodate paper checks, ACHs or electronic payments. Reduce the time it takes to pay vendors with features including invoice importing, recurring invoices, and positive pay file generation.

Payroll

Your employees need to be paid correctly and on time. Our solution offers time and attendance, benefits administration, deductions, blended rate overtime, earned wage access, W-2s, Affordable Care Act, federal, state and local reporting. See why our payroll is used to pay 48,000 employees every pay period without outages, downtime or delays.

Bank reconciliation

Experience quick and easy reconciliation of all bank accounts with automated integration from billing, accounts payable, and payroll.

Financial reporting

Leverage our flexible, real-time reporting options, with drill-down capabilities. Choose from more than twenty reporting formats that can be summarized or include details of the entire organization, or for any single division or department.

Fixed assets

Easy-to-use tools allow you to add, retire and depreciate assets with direct integration from accounts payable and the general ledger.

Capital projects

Efficiently track capital budgets with the seamless integration of transactions from accounts payable and the general ledger.

Everything you need in one system

Put your financial data to work with MatrixCare's industry-specific solution. You'll get comprehensive, convenient tools that can streamline processes and improve staff efficiency.
