

MATRIXCARE INTELLIGENT AUTOMATION SERVICES

# Reclaim your hours, refocus your team

Turn manual workflows into streamlined processes. MatrixCare Intelligent Automation Services uses robotic process automation (RPA) to help automate repetitive tasks, supporting faster workflows and more consistent outcomes.

### What this can help solve:

- > Repetitive tasks like billing and claims slow teams down
- > Limited staffing and rising labor costs stretch resources
- > Generic tools miss the nuances of healthcare workflows

### Why now:

Post-acute providers are balancing high volumes and growing administrative demands. A healthcare-specific approach to automation can help streamline the day without replacing core systems.

### Time-savings proof:

number of hours saved

200

potential hours saved annually

1,200-1,400

Medicaid claims automated

57

Medicare claims automated

3,800

*(Beta customer over two months for one automated process. Results may vary.)*

### The bigger industry picture

Automation can help free up\*

UP TO  
**50%**
