

MatrixCare

A connected EHR ecosystem

BUILT AROUND YOU

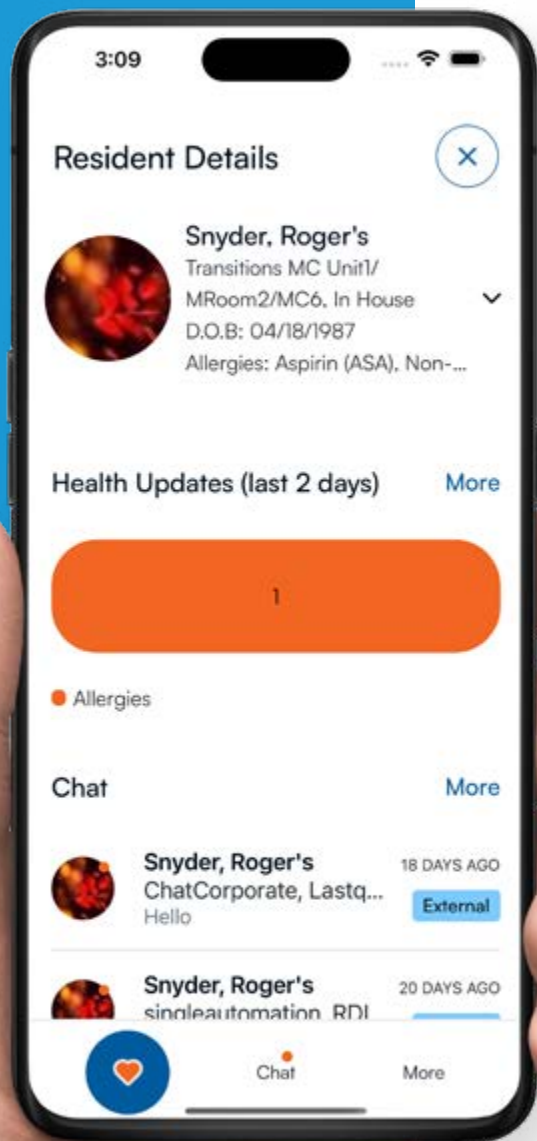

Solutions that support your teams,
residents, operations, and growth

Your organization moves fast, and your technology should keep up. MatrixCare brings connected solutions into your EHR to support teams delivering care, the residents and families you serve, and the operations that keep everything moving.

Choose what fits today, then scale as your needs grow.

Keep leads moving and beds filled

[CRM](#) helps move leads, referrals, and admissions forward through automated workflows, real-time visibility, custom reporting, and EHR connectivity.

Bring hospital data into clearer view

[MatrixCare Exchange Data Manager](#) securely pulls hospital information into your EHR to help minimize manual entry, support faster admissions, and give teams access to more complete resident information.

Keep families connected to care

[MatrixCare Engage](#) supports communication and transparency with real-time updates, secure access to health information, and mobile-first tools that help clinicians stay efficient.

Make paperwork one less thing to worry about

[MatrixCare Engage eForms](#) helps turn admissions into a paperless experience with digital forms, e-signatures, auto-filled data, real-time tracking, and audit trails.

Turn resident data into action

[Clinical Advanced Insights](#) uses AI-supported tools to help teams track acuity, fall risk, condition changes, vitals, and documentation so they can recognize changes and respond sooner.

Make every plate count

[MealTracker](#) helps teams create dietitian-approved menus that meet clinical requirements and resident preferences while minimizing food waste and supporting cost control.

Support safety without disrupting privacy

[Ambient Operating System](#) uses discreet, passive sensors to identify changes in daily activity, provide immediate fall notifications, and support more informed care decisions.

Help therapy teams keep care moving

[Innova Therapy Solution](#) brings therapy-first documentation, scheduling, patient information, and payer details into one intuitive experience that can help minimize denial risk.

Make payments easier to manage

[Payment Portal](#) gives residents and families flexible ways to pay, set up autopay, receive balance alerts, and manage paperless statements. help clinicians stay efficient.

Keep cash flow moving

[Revenue Cycle Management Services](#)

provides hands-on support for reimbursement, A/R cleanup, reporting, analytics, cash posting, account visibility, reviews, and training.

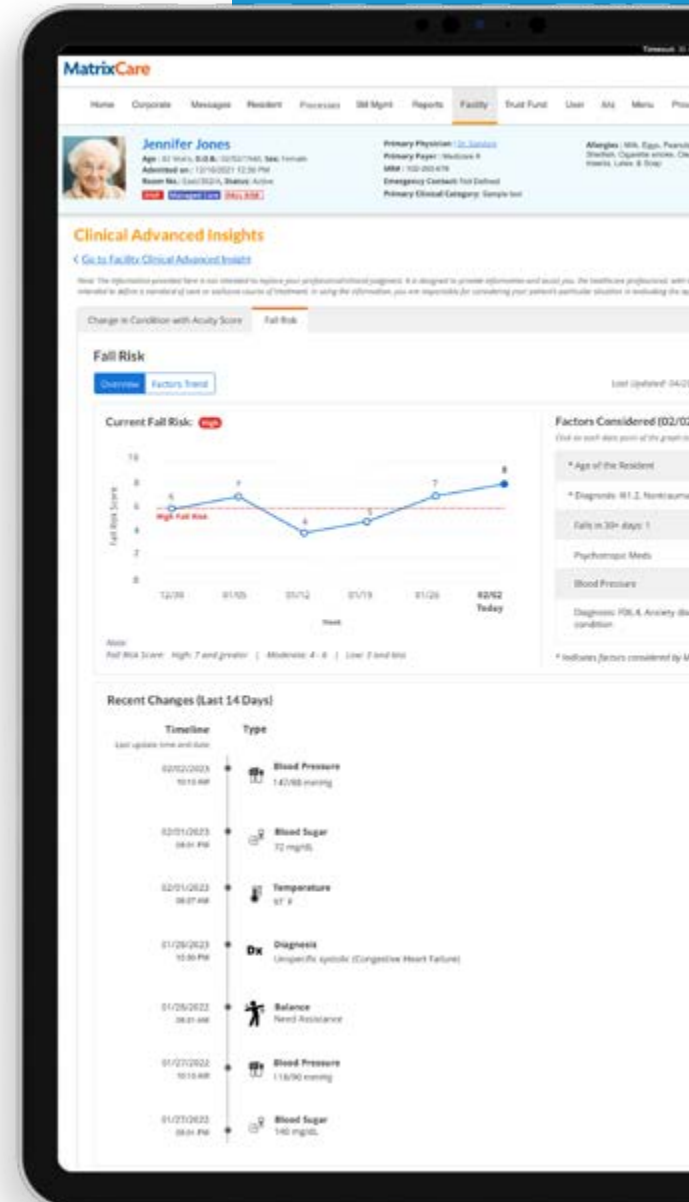

See your finances more clearly

[Enterprise Financials](#) brings accounting, payroll, budgets, assets, inventory, forecasting, and reporting into secure, real-time tools built for long-term care.

Make HR and payroll feel lighter

[ProLiant Human Resources/Payroll](#)

helps centralize payroll and HR tasks, automate everyday workflows, and connect teams with certified HR and payroll professionals.

When your technology works together, your teams can too

The right technology should support more than a single task or department. It should help create stronger connections across your organization, making everyday work feel more coordinated, informed, and manageable.
